NEXT FORGED

Your vision, custom-made.

At NEXT Forged, we turn your unique vision into a premium reality with bespoke forged wheels. We specialise in creating custom forged wheels for every type of vehicle, offering virtually limitless possibilities for designs and finishes tailored entirely to your requirements and preferences. Our professional team brings imagination and engineering together quickly, ensuring that your forged wheels stand out with a truly distinctive appearance.

The process begins with your idea and a detailed 3D rendering of your concept. This allows you to review and approve every curve and detail before production begins. Our commitment to precision ensures that the final product complements both your vehicle and your individual style. With a streamlined process and a dedicated team, we deliver your bespoke wheels in just six to eight weeks.

WHY CHOOSE NEXT FORGED?

- **Aerospace-grade 6061-T6:** We use heat-treated 6061-T6 aluminium to achieve an exceptional strength-to-weight ratio. The result is an ultra-light wheel engineered for maximum performance, yet strong enough for demanding road conditions.
- **Limitless compatibility:** We manufacture wheels for every type of vehicle and deliver a precise fit, every time.
- **Complete creative control:** From intricate spoke designs to distinctive finishes—including brushed, polished, powder-coated and multi-tone treatments—the design is entirely yours.
- **Precision engineering:** Every project begins with a detailed 3D drawing. You review, refine and approve the design before a single piece of aluminium is machined.
- **Fast delivery:** Where bespoke production can take months elsewhere, our professional team can deliver your completed set in just six to eight weeks.

OUR STORY

Born from more than twenty years of automotive excellence at NEXT Exclusives.

NEXT Forged grew from NEXT Exclusives' passion for perfection. Since 2002, we have specialised in the purchase and sale of some of the world's most exclusive cars. More than two decades in the luxury automotive sector have taught us that even the most beautiful cars can be elevated by the right details.

We originally entered the wheel market as a customer, searching for premium forged wheels for our exclusive stock. Frustrated by long lead times and limited design flexibility, we decided to address the gap ourselves. By applying our deep understanding of luxury standards to our own production process, we now provide the reliability, speed and personalisation that we—and our customers—previously found difficult to source.

B2B Price List

Fully bespoke wheels, forged and CNC-milled from 6061-T6 aluminium.
Delivery time is six to eight weeks. Prices exclude VAT and include delivery.

Monoblock

Wheel size	Price
